## 1. 4Q12 Preliminary Earnings - Sales \& OP Highlights

- Sales slightly edged down YoY to W119bn.
- Korea domestic sales decreased $16 \%$ YoY to W34.3bn. Again, sales through TV shopping remained particularly weak.
- China sales came in at W59bn (+15\% YoY or $+13 \%$ YoY growth in RMB). Sales remained brisk across all distribution channels.
- Operating profit fell 39\% YoY to W11.5bn (OPM: 10\%)
- In order to boost our operating efficiency in the North America market, we have decided to switch from direct sales model to indirect one. We were able to find a proper local sales partner sooner than expected, which expedited the transfer of works. As a result, we had to add a total of W4.3bn (including W1.5bn obsolete inventory in the US planned to be expensed out in 2013) to COGS.
- Adjusted operating profit excluding this additional cost was W15.8bn, slightly surpassing our guidance of W15.3bn (adjusted OPM: 13\%). Despite sluggish sales and discounted sales of obsolete inventory, we reached our OP target on the back of corporate-wide efforts to improve profitability. Also, we have reduced cost burden for 2013 by preemptively taking care of risks remaining at the US entity.
- Recently revised K-IFRS accounting classifies loss from inventory write-off as a COGS item and the rest as nonoperating items. Operating profit was W15.3bn based on the pre-revision standard (OPM: 13\%).
